

YOUR VERY INTERESTING POSTER TITLE

First Author¹, Second author², Third Author¹

¹University of California, Berkeley; ² Other Institution

Background

- Put your background information here.
- Bullet points make the content digestible.
- Only include salient details.
- Feel free to cite a few important references [Author et al., 2022].
- These boxes are resized automatically.
- Use `\vspace{}` to alter the amount of white space above and below the text.

Statistical Problem Formulation

Outline the statistical problem formulation of your topic using as little notation as possible.

Inference

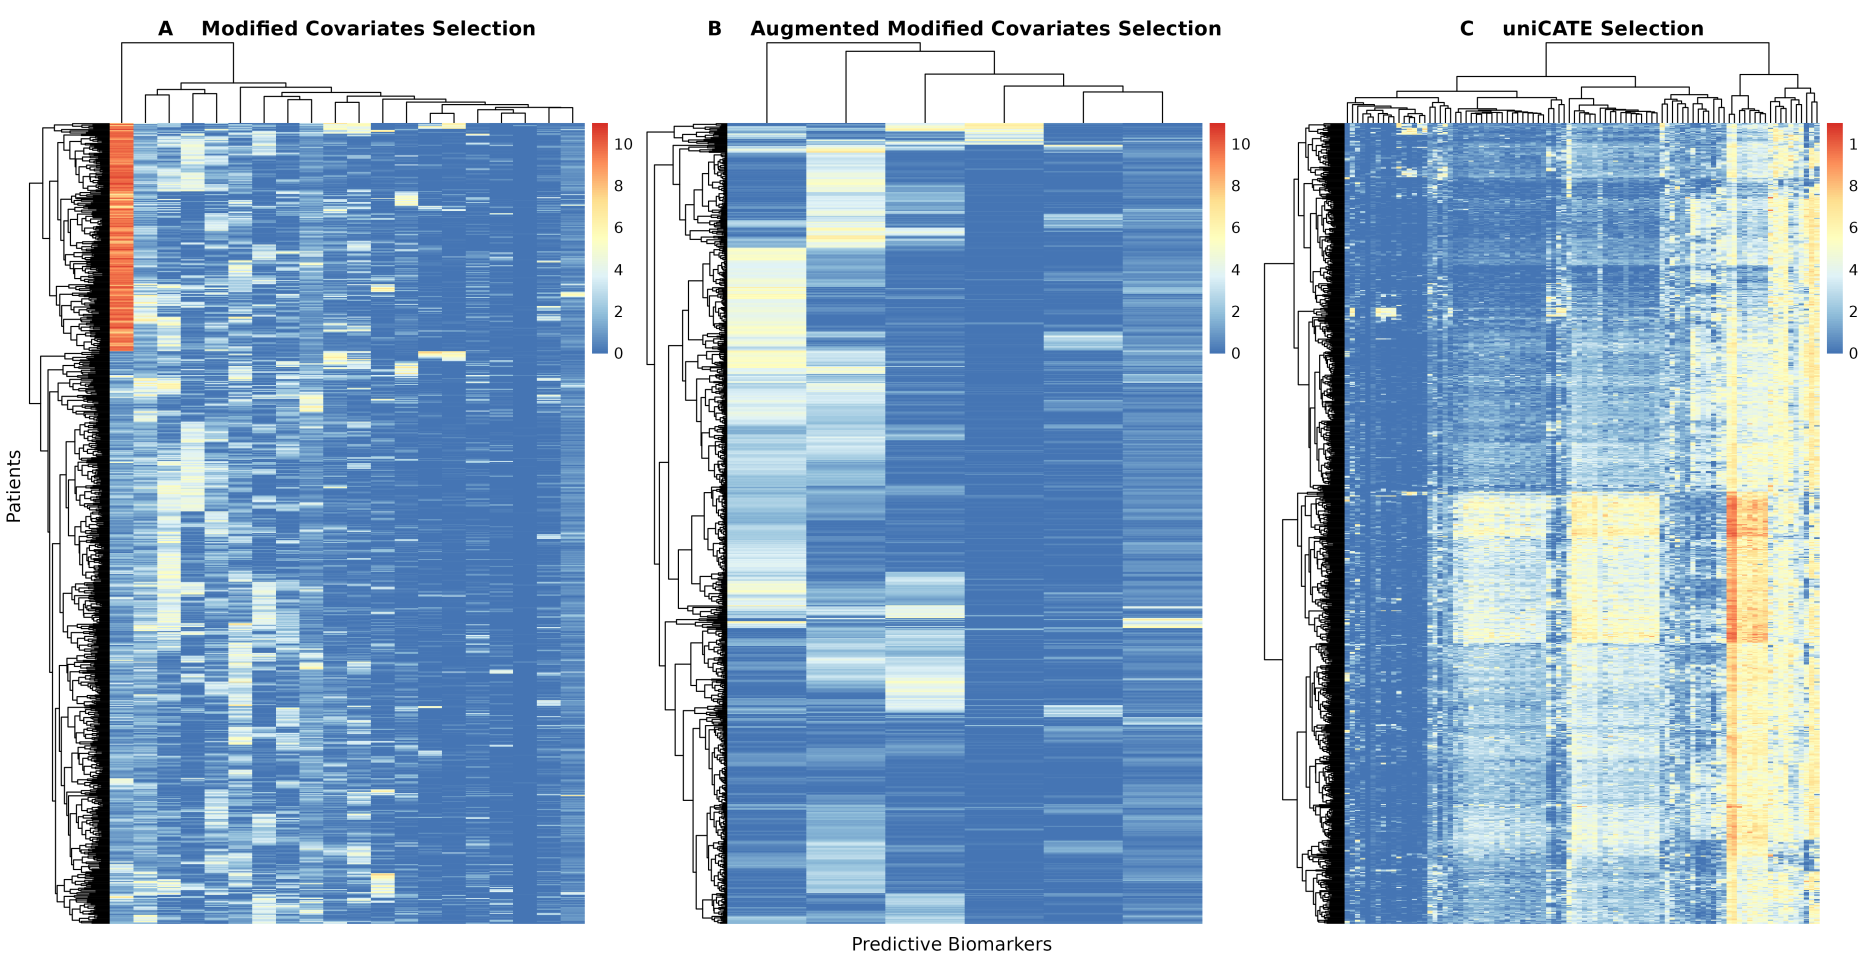

Next, you can outline the inference procedure that you’ve proposed to solve your problem.

Interesting Result

If you’d like to present an important theorem or lemma, or want to call attention to an interesting fact, then you can highlight it with a sub-box.

Simulation Study

If you performed any numerical experiments, present them here. Here’s an example. Try to avoid too much text, if any. If anyone has questions, you can answer them directly.

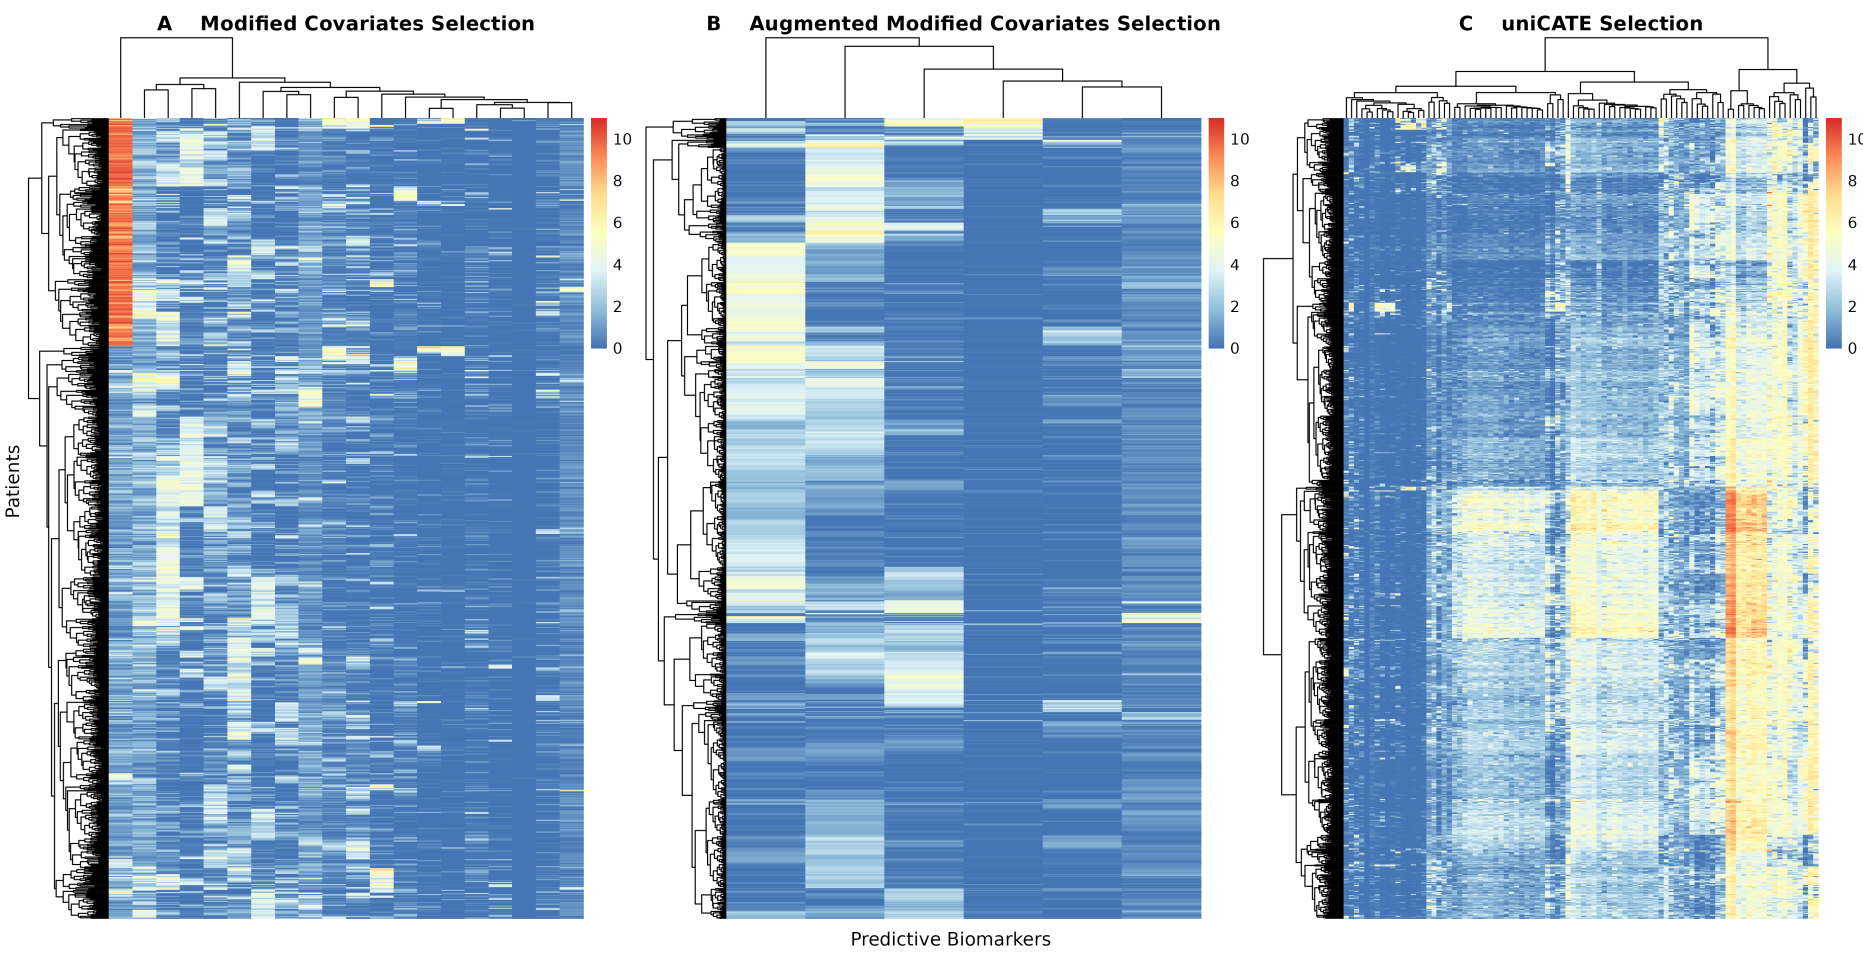

Funding

Don’t forget to thank your funding sources! You can also use this box for acknowledgements by modifying the box title.

Application

Include the results of your real-data application here, if any. Again, try not to include too much text. Let the figure(s) speak for themselves.

Conclusion

A one-sentence takeaway of your findings. Don’t forget to include links or QR codes to your paper, preprint and/or software, if publicly available. QR codes should be placed in the `logos` folder. Don’t forget to update the path to the QR code on line 32 of this TeX file.
